DATE: 24 May 1999

MEMORANDUM FOR INPROC USERS

SUBJECT: Software Version Description (SVD) for Installation
Support Module (ISM) Military Personnel In-Processing (INPROC)
Interim Change Package (ICP) P09-A13-08-04-A

1. Enclosed is ICP P09-A13-08-04-A which provides a formal change information to the Military Personnel In-Processing (INPROC) ISM
2. Acknowledgement of installation of this ICP must be made IAW instructions provided in Enclosure 1.
3. This memorandum certifies that the ISM subject software has been thoroughly tested, is considered to be a quality product, and is hereby authorized for release to a production environment.
4. Security Implications: NONE.

Change Package Control Number: P09- A13- 08- 04- A

1. Scope.

1.1 Identification. This Software Version Description (SVD) applies to the Military Personnel In-Processing (INPROC) running on Army Standard Information Management System (ASIMS) and networked AIX operating system on UNIX platforms.

1.2 System Overview. INPROC is part of the ISM Project that is an army-wide Major Automated Information System (MAIS) initiative. The primary objective of ISM is to enhance, through automation, installation management functions. ISM applications consist of standard procedures packaged into functional applications which automate as well as integrate day-to-day installation processes. ISM applications use the Installation Level Integrated Data Base (ILIDB), which is the central repository for data that is common to more than one ISM application, and various local databases that contain data elements unique to the individual ISM applications.

The purpose of the INPROC ISM is to ensure that soldiers are ready for deployment and that they meet all soldier readiness personnel processing requirements. In support of this, INPROC is an automated computer system designed to assist in-processing clerks in processing Army soldiers and their families upon arrival at an installation. Benefits expected from its use include elimination of multiple data entry and redundant record-keeping, data validation, ensuring that data entry requirements are completed in full, and providing uniformity to the process at all installations.

1.3 Document Overview. This document provides the instructions necessary for the implementation of the formal Interim Change Package (ICP) P09-A13-08-04-A of INPROC. It informs the users of the changes made to the system and provides Point of Contacts (POCs) to be contacted in case of problems.

2. Referenced Documents.

2.1 Referenced Documents. This paragraph has been tailored out.

3. Version Description.

3.1 Inventory of Materials Released. This paragraph has been tailored out.

3.2 Inventory of Software Contents. Hardware platform - ASIMS/UNIX AIX 4.2 operating system users (Installation supported). This change package contains the following files.

PROGRAM	VERSION	UPDATE
inproc_0804.cpio.Z	0800	21 May 1999
install_inproc_0804	0800	21 May 1999
README.inproc_0804	0800	21 May 1999

Change Package Control Number: P09-A13-08-04-A

3.3 Changes Installed.

3.3.1 Corrector Descriptions - Technical.

1. ECP-S/E P09-U401-007
 - A. CYCLES: None.
 - B. PROGRAM: INPROC
 - C. PROBLEM: Unable to update workcenter information.
 - D. RESOLUTION: Modified code to permit user to change workcenter information.
 - E. ICP: P09-A13-08-04-A

3.3.2 Corrector Descriptions - Functional. None.

3.3.3 Summary of Changes.

- a. Copy library member changes.
 1. Changed: None.
 2. Deleted: None.
 3. Added: None.
- b. Control library member changes.
 1. Changed: None.
 2. Deleted: None.
 3. Added: None.

3.4 Adaptation Data. This paragraph has been tailored out.

3.5 Related Documents.

3.5.1 Technical Documentation Changes. A new AIX version of Software Center Operator Manual (SCOM), AISM 25-P09-A13-AIX-SCOM dated 10 September 1998 has been issued. This current version of AISM 25-P09-A13-AIX-SCOM may be obtained from:

U. S. Army Information Systems Software Development Center-
Washington
Attn: AMSEL-SE-IS-SDW-E-I, Stop H-17.
Fort Belvoir, VA 22060-5576.

3.5.2 Functional Manual Changes. A new AIX version of Software User Manual (SUM), AISM 25-P09-A13-AIX-SUM dated 01 October 1998 has been issued. This current version of AISM 25-P09-A13-AIX-SUM may be obtained from:

U. S. Army Information Systems Software Development Center-
Washington
Attn: AMSEL-SE-IS-SDW-E-I, Stop H-17.
Fort Belvoir, VA 22060-5576.

3.6 Installation Instructions. These instructions explain how to install INPROC ICP P09-A13-08-04-A onto the host computer at the installations.

2

Change Package Control Number: P09-A13-08-04-A

Pre-Install Procedure. Before beginning to install INPROC ICP P09-A13-08-04-A onto the ISM host computer, follow this procedure to make sure you have the information you will need when installing.

STEP 1. Verify Oracle. The Oracle RDBMS must reside on the host and be on-line.

Install Procedure. This procedure installs INPROC ICP 0804.

STEP 1. Login with the login name of "root".

STEP 2. Select a drive on the system that contains at least 300 meg of available disk space. Change directory to that drive and create a directory called "ICP.0804". Place the following files for ICP 0804 in the directory ICP.0804.

inproc_0804.cpio.Z	1441409	21 May 1999
install_inproc_0804	3466	21 May 1999
README.inproc_0804	1119	21 May 1999

STEP 3. Change directory to the start directory created in step 2 and type:

```
chmod 777 install_inproc_0804 <Enter>
./install_inproc_0804 <Enter>
```

STEP 4. The install_inproc_0804 will complete the following:

a. uncompress and uncpio the inproc_0804.cpio file.

p09-a13-08-04-svd.txt

- b. change the ownership of and copy the files in this ICP into the home directory of user "inproc".
- c. record all output from each of the steps performed in a file named "inproc_0804.log" located in the directory specified in STEP 2.

STEP 5. Results of the installation in inproc_0804.log should be reviewed.

3.6.1 Installation Effective Date. This ICP should be immediately implemented upon receipt or NLT 30 days from date of receipt.

3.6.2 Security Implications. This paragraph has been tailored out.

3

Change Package Control Number: P09-A13-08-04-A

3.6.3 ANSOC Installation Instructions. All users receive the same baseline with change package number through e-mail and Status Tracking and Reporting System (STARS) Bulletin Board System (BBS). This change package contains the following files:

Quantity	File ID	System	Change Package No.
1	inproc_0804.cpio.Z	AIX OS 4.2	P09-A13-08-04-A

Ensure that all master file backups have been completed prior to loading this package.

Use these load instructions to develop load procedures that work best for your installation.

Due to various user configurations, each installation must determine appropriate block-size and library allocations.

Users must not, repeat, must not, make changes to the files.

Security impact: None.

3.6.4 Special Installation Instructions - All Users. None.

3.6.5 Point of Contact. If there are any problems or questions with the installation, or any shortage to the contents of this package, call the Army Network and Systems Operation Center, Ft. Huachuca: DSN 879-2572 or 1-800-305-3036.

3.6.6 Report of Implementation. Implementation of this change package must be reported by completing the change package implementation form. This report must be sent to Ft. Huachuca using Fax or mail.

3.7 Possible Problems and Known Errors. This paragraph has been tailored out.

4. Notes.

4.1 Notes. This paragraph has been tailored out.
